## BRYAN TURNS LOOSE ON THE WETS

### BONE DRY PLANK OFFERED AS A MINORITY REPORT

## Platform Committee Dodges a Dry Plank In Its Final Report

(By Associated Press)  
SAN FRANCISCO, July 2.—Framed after days and nights struggle with clashing interests and opinions the Resolutions Committee draft of the platform was laid before the democratic national convention today for adoption. Further conflict in the convention itself is regarded as certain. Decisively defeated in efforts to force a bone dry declaration into the committee structure, William J. Bryan announced his purpose of renewing the battle on the floor.

The committee platform is silent on prohibition enforcement. It was a long document. Efforts to produce a brief emphatic statement of principles had been balked from the outset. The preamble was brief and confined to a tribute to the leader.

Ship of President Wilson among the planks came an endorsement of the League of Nations, condemnation of the Republican senate for having interposed "partisan envy and personal hatred" in the way of world peace. The president's stand against "reservations designed to cut to pieces vital provisions of the Versailles treaty" was applauded. Coupled with this declaration went a statement written in after a prolonged struggle that the Democratic party did not oppose "reservations making clearer of more specific the obligations of the United States to its League associates."

The Irish plank, which was the center of hours of committee dispute was brief. Specific reference followed a general assertion reaf-

firmed the principle of national self-determination as a war aim which victory established. It merely renewed "within the limitations of international comity and usage" previous expressions of the Democratic party of sympathy for Irish aspirations for self government.

A wide range of other subjects treated by platform, including agriculture, labor, soldier relief and domestic problems.

The Armenian plank also expressed sympathy but was silent on the question of acceptance by the United States of a mandate over that country for which the president asked authority of congress.

Among other international subjects touched was the non-admission of Asiatic immigrants declared to be as a national policy a "true expression of the judgment of our people." The Mexican plank said the new Mexican government should be recognized when it proved ability to maintain order signified its willingness to meet international obligations and had given foreigners in Mexico "rights as well as duties."

In one point throughout the platform the committeemen, apparently, were in full accord. It sharply indicted the Republican congress and Republican party on many counts. Failure to enact tax revision measures through "sheer political cowardice" is charged against the Republicans and claims of Republican economy were branded as false.

## RICH FIND REPORTED IN DIVIDE

Activity in buying orders for Tonopah Divide which marked the business of the San Francisco Stock Exchange today is a reflection of a wonderful improvement; that has taken place in the 317 crosscut where the company has been prosecuting important development. The stock advanced from \$1.32 1/2 to \$1.40 on buying orders which were said to have been placed by the wise ones of the market.

The great change came in a drift on the 317 that was sent out on a small stringer of low grade ore showing up in a crosscut. This drift was advanced about ten feet when the stringer widened to a full face of ore 18 inches of which averaged \$101 and an additional 2 1/2 feet averaging \$48.50. It is impossible to say how wide the vein is at this point as only one wall is exposed in the drift.

Shaft sinking was resumed this week and will be rushed to the 1300 foot point before any crosscutting to the vein below the 585 level. In the meantime, shipments are going forward to the MacNamara mill without abatement either in quantity or value.

## AMERICANS IN TURKISH POWER

(By Associated Press)  
WASHINGTON, July 2.—In a concerted effort that is being made to bring about the release of Mr. and Mrs. Paul Nilson of Illinois, who are held by Turkish Nationalists in an American destroyer has been dispatched to Mersina. The French authorities are holding Turkish hostages Admiral Bristol at Constantinople. It was reported to the state department.

## NO DIMES OR NICKELS IN YUKON COUNTRY

(Correspondence Associated Press)  
DAWSON, Y. T., June 29.—Though luxury taxes call for small coins the Yukon Development League has rejected a proposal to introduce dimes and nickel into local circulation. Dawson never has had any smaller coin than the twenty-five cent piece and will adhere to it.

Very little saving the ore runs \$150 per ton.—Hess River Nevada

## FIRST GUN IN GREAT BATTLE; BOURKE COCKRAN FOR WETS ALSO OFFERS AMENDMENT

(By Associated Press)  
SAN FRANCISCO, July 2.—The battle of the wets and dries got under way in the democratic convention this afternoon when the platform had been read without making mention of a prohibition plank. Bryan was recognized to offer a bone dry plank as a minority report. The reading of the platform was concluded in two hours and seven minutes after it began.

Senator Glass moved that the platform be adopted and Bryan at once bounced out of his chair on the platform to begin his fight for the minority planks.

Chairman Robinson, Senator Glass and Bryan appeared together on the speaker's platform. Some cheers for Bryan followed from corners of the gallery and there were a lot of impatient demands from the convention to get under headway.

"Let's go," the crowd called. A verse of the "Star Spangled Banner" served to key the intense expectancy of the crowd. Amid cheers Senator Robinson presented Senator Glass and the reading of the platform began.

Delegates and galleries listened attentively and interrupted the open

ing references to President Wilson with handclapping. At the point where the platform declares for the League of Nations, Senator Glass put emphasis on the word "the" and the convention stood up and cheered for a minute. Senator Glass began

reading at the rate of 56 words a minute. The platform exceeds 5000 words.

When the direct declaration for ratification of the treaty was reached in the reading there was another demonstration about half the delegates again getting to their feet and cheering the words of the platform.

Bryan presented his own five planks and a prohibition plank by former Congressman Hobson. Then Bourke-Cockran, of New York, took the platform to present another minority report. Cockran presented a substitute for Bryan's prohibition plank and declared that Bryan, having presented the question of prohibition he would "thank heaven that the convention can no longer dodge it."

The plank which Cockran presented while declaring for the validity of the prohibition amendment, also declared for the manufacture "for home consumption only of cider, light wines and beer."

The convention greeted the reading of this plank with a mighty shout and prolonged cheers.

The amendment reserved to the states the right to fix the alcoholic content.

Cockran told the convention that had Bryan consented to let the committee's report stand he doubted whether the wets would have spoken. "But Bryan and I have an irreconcilable within the same hall," Cockran added.

E. J. Doherty, of Los Angeles, presented a minority report on the Irish question proposing a plank providing for recognition of the Irish republic.

On motion of Senator Glass the debate was limited to three hours and thirty minutes, on suspension of the rules. Chairman Robinson recognized Bryan for one hour and the real fight started off.

## HIGH GRADE AT DEPTH IN THE BROKEN HILLS

RENO, July 2.—Two sensational strikes of rich ore are officially reported today. The management of the Broken Hills Silver Corporation and of the Thompson group of four claims adjoining the Belmont claim of the Broken Hills Silver Corporation, a vein four feet wide has been opened up at a point fully 500 feet from the main shaft. The rich ore here gives average assays of 41 ounces of silver per ton and 40 per cent lead. Over on the Thompson group of claims, 2000 feet away, the main shaft has encountered a vein from which assays of from \$15 to \$60 have been obtained.

The strike on the Broken Hills has wrought a first class sensation because the new vein has been uncovered fully 500 feet away from where the company has already developed down to 150 feet in the mine its own high grade ore body from which ore is now being sacked that is officially stated to assay 223 ounces of silver per ton and 9 per cent lead. The new strike is in a previously undeveloped portion of the company's ground.

The rich ore outcrop at the surface at only one point. Curiously enough, in the zone of the highest grade ore on the main vein of the Broken Hills property, outcrops of rich ore also occur in but one place at the surface. Developments on the

Broken Hills vein, and sloping open at its along the creek, ore shoots have shown that sometimes the high grade ore extends no more than 15 or 20 feet of the surface and no indication remains above on the surface to lead one to suspect its presence below.

Two shifts of miners are now

## Balloting Not Likely To Begin To Night In View of Fight

(By Associated Press)  
SAN FRANCISCO, AUDITORIUM, July 2.—All is set for the battle of wets and dries when the democratic national convention assembled this morning with every thing ready for a battle royal. The first skirmish of the fight was set to come in submission of a wet plank by James Nugent, of New Jersey, and a dry plank by Bryan. There was little prospect of balloting for a nominee before night, if then.

Bryan came to the convention hall prepared to offer five planks as minority reports, if dry plank was the same as announced on his arrival at San Francisco last week. In another plank he renewed his fight for a national bulletin to be published by the federal government. He also had a profiteering plank proposing elimination of "unnecessary

## ELKS LINE UP ON THE FOURTH

The Tonopah Elks baseball team is ready for the games to be played at Mina the fourth and fifth of July and are confident of winning both games. They have a good hitting team. The probable lineup for the games follows:

John, 2nd b; Ryan, cf; Cain, 1st b; Brown, 3rd b; McFadden, ss; McAllen, c; Murphy, lf; Prout or St. of; O'Neill, p.

For the second game the same lineup will appear with O'Neill, Murphy, Prout to do the pitching. A number of cars are going down to help the boys bring home the bacon. In connection with the baseball games the people of Mina are putting on a good time celebration with sports of all kinds. A big dance will top off the festivities.

General invitation is extended to people of Tonopah.

## GO SWIMMING WATER IS FINE

The swimming pool is in fine shape for bathers these days which do not affect the temperature of the water which stands at 60 degrees making it most agreeable for a plunge on the coldest days. Under the management of Dennis Hill the baths have been placed in first class condition and patrons are assured that they will not be annoyed by any juvenile disturbers who caused some trouble shortly after the natatorium was opened for the season. A drinking fountain has been installed by the American Legion for the Fourth of July picnic and this convenience connected with the city water supply will remain as a permanent fixture. The hours remain from 11 a. m. to 5 p. m. and 7 to 9 p. m. Minors are not admitted during the evening.

In Turkey, a Moslem grave is never reopened on any account. With a view to removing the faintest chance of a grave being thus defiled, the Moslems plant a cypress tree on every grave immediately after the burial.

Snow was played by the children of Ashland; kept 4,000 years ago.

## GREAT STRIKE AT SAN JUAN

About twenty years ago, William Easton and J. B. Dunstan became the owners of a group of claims in San Juan canyon, about 35 miles south of Austin on the western slope of the Toiyabe range.

During the war nothing was done on the ground on account of unfavorable conditions, but as soon as the war was over work was resumed on a tunnel which is being run on an immense ledge showing lead-silver ore and carrying some gold, which shows in the canyon on the west side of the high ridge which divides Reese River and Smoky valleys, and is continuous clear across the mountain to the eastern or Smoky Valley slope, a distance of at least three-quarters of a mile.

The tunnel has this season been cut forward, following an irregular seam of galena and lead carbonate along the hanging wall of the ledge, and about two weeks ago this seam began getting larger and continued to grow until the entire face of the tunnel is now in the very rich ore.

The tunnel, since the rich ore was encountered, has been advanced about twenty feet with a face of ore reaching into the hanging wall on the left clear across the full width of the bore which is six to seven feet wide, and for the twenty feet the right side of the tunnel is ore.

The ore runs in leaves of galena, from two to ten inches thick, and honeycombed, between the layers of galena are masses of lead carbonate. The galena, all pitted, looks like old pieces of rusty iron, with the carbonate filling the rest of the pits.

At 100 feet from the portal of the tunnel a crosscut to the footwall has been made, showing the ledge to be fourteen feet from wall to wall.

About a carload of shipping ore has been taken out, the fines or carbonates being carefully sacked, and the chunks of galena piled up to be sent to the smelter.

A series of assays shows that with
